### About the Workshop

**\*Note: If you've been in a leadership role for fewer than 3-5 years, we strongly recommend Lead On as a prerequisite**

As an experienced Leader you've seen it all: every type of employee, every scenario, and every problem known to business – and you've managed to survive them all. But are you still approaching your leadership challenges with the same perspective you had when you started down this twisted road? And has your 'real world' experience made you cynical about management or management theory? If this sounds familiar, then Next Level Leadership is the workshop for you.

One of the greatest challenges in a senior role is that you're so busy being accountable for the successes and failures of the team, that you have precious little time to take a step back and ask yourself if there's a better way. This workshop collects and covers a host of new thinking approaches and progressive tools to help you pivot like a badass ball player. You'll explore advanced methods for 're-framing' ideas, discover novel cognitive tools that will actively force you to rethink strategies and challenge some out of date assumptions about your role as a leader.

Next Level Leadership provides a safe and practical environment to explore what you don't know about what you don't know, and see how the old models of leadership that applied in the 'Information Age' must change for the 'Conceptual Age' that is driving our world. And with all of the next context and skills on offer, you'll finally put it all together and see if you reframe, rethink, rework and renew some old challenges with very new thinking.
